# Debugging: Oreo Clicker

## Expected Behavior:

Oreo game title with number counter below and an Oreo cookie image below to be centered on the page. That is starting up the game. I also expect that if I click the cookie the number above would increment.

## Problem:

The Oreo game title and image renders on the page. The number counter does not render. Also contents on the page are not centered.

**Console Log:**

- Failed to load resource: the server responded with a status of 404(). styles.css:1
- Failed to load resource: the server responded with a status of 404(). app.js:1
- Failed to load resource: the server responded with a status of 404(). styles.css:1

## Recreating Error:

Visit [https://oreo-clicker-game.vercel.app/](https://oreo-clicker-game.vercel.app/) to see.

## Possible Solutions:

- Directory not set up correctly

## Experiments:

1. Changed the href for link and script. (Did not work)
2. Remove public and src directory and changed the href for link and script. (It worked)
